

# DIY LED submersible fish light

I wanted a light to use on some piers I fish and be able to take on boat as well. After looking at some available online, I really didn't want to pay that much and I saw that there were some pretty good ideas out there for the do it yourselfer. So I built one. It's just under 2' long with 600 led's. I had an old plastic container that I used for holding eels and made into a battery box that can strap on a pier piling. A small 12v is all that's needed to run it.

Minus those couplings in the pic that I didn't use, the parts are simple and there are many ways to build it. Amazon has the led light strips and the acrylic tube. In all it can be built for under \$50. Light strip is 16' wrapped around 1" pvc then secured inside clear tube using large washers glued on the 1" pvc pipe ends. I used a plastic epoxy from loctite for the joints. Used a waterproof cable gland on the end cap, epoxy inside and out.

I've submerged it in the bath tub and all seems fine. Gonna attach a little weight to the end so it will sink right and then try it out in the river. I may plasti-dip the ends to cover all joints for extra protection but we'll see.

This is about as tutorialistic as I get. I didnt take any more pics but its pretty straight forward. Always more than one way to do things.

Size: 3528 Waterproof 600 Leds

- 
- □ □ □ □ □ □

Color: Green

- 
- □ □ □ □ □ □ □ □ □ □ □

- 
- Self-adhesive tape on reverse for easy attachment, easy to install
- High density, 600 led. Long life span: 50,000+ hours in average
- Low temperature & low power consumption
- Ultra bright 3528 SMD LED with high intensity and reliability
- Flexible strip for curving around & durable quality

### • Product Description

- Size: 3528 Waterproof 600 Leds | Color: Green
- Specifications:

- LED Type: High Quality SMD3528 LED

- Length: 16.4FT (5M)
- LED Quantity: 600 LEDs (120Leds/M)
- Color: Green
- Beam angle: 120 degrees
- Input voltage: 12V DC
- Working Temperature: -20°to 50°
- Protection Rate: IP65 Waterproof
- Can be cut 3 LEDs per Unit

**Amico 5 Pcs Waterproof PG11 Black Plastic Cable Glands Joints**  
by Amico

Price: \$2.09 & FREE Shipping

In Stock.

Ships from and sold by Water & Wood.

Estimated Delivery Date: July 8 - 24 when you choose Standard at checkout.

- Product Name : Cable Gland;Model : PG11;Degree of Protection : IP67 (Water Proof)
- Cable Range : 5-10mm/ 0.19"- 0.39";Thread O.D. : 17.6mm/ 0.69"
- Thread Length : 9mm/ 0.35";Total Size : 23.5 x 37mm/ 0.92" x 1.45" (Max.D\*H)
- Material : Plastic;Color : Black
- Weight : 32g;Package Content : 5 x Cable Gland

I just used a broken extension cord that I had. Make sure its the exterior use type. Cant recall the gauge but it had to be something like 14, 16, or 18. Either would be fine in my opinion.

I used my light not too long ago and within 15 minutes a nice bait ball formed and stayed on it for a long time. I hooked it up to a small 12v bat and since the led draws little juice, it lasts a long time. I also found that it took around 14 ounces to hold it on the bottom. battery like this here

## UPG UB1280I Sealed Lead Acid Batteries
