

# Modified Slim Beauty Connection Knot

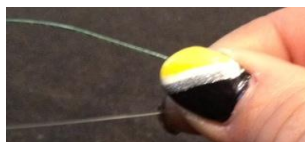

1) Overlay leader material over braid to make two parallel lines. Your tag ends will be facing in opposite directions.

2) Take the tag end of your leader and fold it into a  $\frac{1}{2}$  circle. Wrap tag end around the two parallel lines 4 times working towards your reel (Uni Knot).

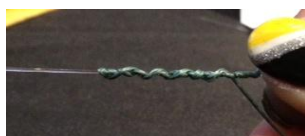

3) Wet your line and cinch your Uni Knot by pulling on your leader and tag end of your leader.

4) Pinch open the leader and tag end of your braid.

5) Wrap the braid around your leader ten times, while pinching open a gap.

6) Reverse direction and wrap over and between previous wraps nine times.

7) Insert the tag end of your braid into the gap you pinched open. (Figure 4 & 5)

7) Cinch the knot by pulling the main braided line away from your leader.

8) Cut your tag ends.

Your knot should look like this.

The "Modified Slim Beauty Connection Knot" has become one of the most popular knots in fishing due to both its simplicity and its performance.

The Slim Beauty allows leader material of different diameters to be connected with minimal fuss and results in a high-strength knot with a very small profile passing effortlessly through your guides.
